

Stars & Stripes Bug-O-Rama Preschool Camp 2017 Camp Spotlight

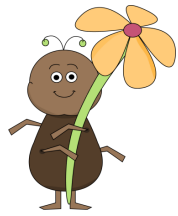

July 24-28, 2017 8:30-12:00pm

(Ages 3-5 yrs.)

Day \$33 Week \$106

This is going to be a week of “insect fun and learning”. We will learn about several different insects along with discovering what ‘buggy friends’ we have around the Stars & Stripes property. There will be crafts and insect related art, as well as games and insect related music and movement activities. Don’t forget the ever popular WATER DAY on Friday. Make sure you bring your bathing suit and towel for a fun-filled end to the week.

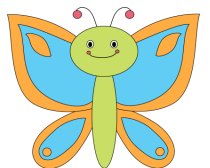

Monday: Insects 101 Today we will dive in to learning about insects as we pretend to be “entomologists.” We will read a cool story and learn some fun facts about insects to help us get in character. Then, we will make our very own “Bug Catching Jar” and venture outside to see if we can use our insect knowledge to catch some bugs! We will also make some pictures of our very own made-up bugs, and discuss what our favorite bugs are. Get ready for a busy day of bugs!

Tuesday: Ladybugs! We will be learning all about ladybugs today! First, we will enjoy the story *Ladybugs* by Melvin and Gilda Berger and learn about some cool ladybug facts. We will create our own ladybug rocks with paint and make ladybug suncatchers to take home! We will also play a fun insect movement game and go outside to bug hunt. It is going to be a fun day in Bug-O-Rama camp!

Wednesday: Lightning Bugs and Bees Get ready for a super fun day, because these bug friends are so cool! We will read stories about fireflies and bees, and learn some awesome new facts about them. Then, we will be able to make a fun honeybee craft, and a cute little lightning bug to take home. If we haven’t caught any bugs yet, we will be sure to find some on our bug hunt today or keep trying!

Thursday: Ants and Crickets Today we will talk about some creepy crawly insects that “bug” us and how they can actually be useful to us (and even interesting to learn about.) Our story, *Hey, Little Ant* will show campers a new perspective on our little ant friends, and we will have a discussion about ant facts and cricket facts that will show campers how these “pests” are actually pretty great insects. We will make crafts of ants and crickets to bring home, and have another chance to bug hunt outside. It is going to be a fun day!

Friday: Caterpillar to Butterfly Our last day of bug camp will focus on caterpillars and how they become butterflies. We will read a story, learn about the life cycle of the caterpillars/butterflies and make cute crafts. Today is water day, so be sure to bring your bathing suit and towel for an awesome time!
